

Call for Workshop Participation

Workshop on

"Teaching UML to non-technical staff"

(all day Monday, October 1)

Fourth International Conference on the Unified Modeling Language
"Modeling Languages, Concepts and Tools"
October 1-5, 2001, Toronto, Ontario, Canada
Sheraton Centre Toronto Hotel
<http://www.cs.toronto.edu/uml2001>

Workshop Organizer: Dr. Ron Suarez, President, Object Insight, Inc.

Problem addressed:

Current textbook approaches are often not adopted by corporations or end up failing because of cost (perceived and real) and complexity.

Solution:

Actively involving the domain experts by creating simplified processes and tools that can be used by the "business" members of the team distributes the responsibility of data gathering of business processes.

Workshop goals:

Participants will compile a descriptive list of problems faced when introducing UML into corporate development environments and offer suggestions regarding improvements to methodology, extensions to UML, and improved tool support (particularly web based collaborative tools).

Workshop participants:

Participants with actual experience introducing UML and Object Oriented approaches into business environments are invited to submit a brief paper describing their current experiences bringing UML into a commercial development environment. The paper may be a brief summary of recent experiences and a statement of goals you would like to achieve in the workshop. The *number of participants* will be limited to 25.

Submit to: ron@object-insight.com

Please join our discussion forum for pre-conference interaction about this workshop by posting a discussion topic or a reply to an existing topic.
